OBJECTIVE

Electronics & Communication Engineering undergraduate at KNIT Sultanpur with hands-on experience in Node.js, Express.js, REST APIs, MySQL, and Java. SIH 26 Finalist. Seeking the Node.js Development to build and maintain backend services, collaborate with a cross-functional team, and contribute to AI-powered mobile app products. Available to start immediately for the full 6-month term.

TECHNICAL SKILLS

Backend	Node.js, Express.js, EJS (Embedded JavaScript), REST API design
Databases	MySQL — schema design, queries, joins MongoDB — documents, collections,
Languages	Java, JavaScript (ES6+), Python, C
Frontend	HTML5, CSS3, Bootstrap, Responsive Web Design
DSA	Arrays, Linked Lists, Stacks, Queues, Trees, BST, Heaps, Sorting & Searching
AI / ML	Intro to AI Concepts (Microsoft), Generative AI & Prompt Engineering (Google Cloud), Data Science, Data Visualization
Tools	Git, GitHub, Canva, Excel

EXPERIENCE

Frontend Development Intern | [CodeAlpha](#) Jun 2026 – Jul 2026

- Contributed to real-world web development projects under industry mentorship.
- Built and improved user-facing features using HTML, CSS, and JavaScript.
- Collaborated with team to deliver responsive, accessible UI components within deadlines.

Executive Member | [Innovation, Incubation & Startup Foundation, KNIT](#) Nov 2025 – Present

- Driving startup culture and innovation at KNIT Sultanpur Collaborated on ideation sessions, incubation events, and cross-team initiatives.
- Developed communication, collaboration, and product-thinking skills in a startup-like environment.
- Conducted multiple startup and technology based events in EFFULGENCE, KNIT's National level tech fest.

PROJECTS

Photography Website | [HTML5](#), [CSS3](#), [Flexbox](#) Mar 2026

- Built a fully responsive photography website with gallery layout, smooth navigation, and mobile-first design.
- Applied Flexbox and CSS3 best practices; deployed as a static site showcasing front-end fundamentals.

WanderLust | [Node.js](#), [Express.js](#), [EJS](#), [MongoDB](#), [Bootstrap](#), [cloudinary](#) 2025

- Built a RESTful API server using Node.js and Express.js with structured routing and middleware for request handling.
- Designed MySQL database schemas and wrote SQL queries for CRUD operations.
- Implemented EJS templating for server-side rendering and tested endpoints using manual HTTP requests.
- A room booking website that lets forks list their places and show to others where others can contact see the location, image and also leave reviews of the listed place.

EDUCATION

B.Tech — Electronics & Communication Engineering | KNIT Sultanpur 2024 – 2028

- Relevant coursework: Data Structures & Algorithms, C, Java, Python, Database Management.
- Active in startup and innovation ecosystem through IISF KNIT.

CGPA: 8.7

CERTIFICATIONS & ACHIEVEMENTS

- Introduction to AI Concepts — Microsoft (Jul 2025)
- Introduction to Generative AI: Prompt Engineering & Foundation Models — Google Cloud (Jul 2025)
- Adobe India Hackathon Round 1 — Team HackWizards, KNIT Sultanpur (Jul 2025)
- Certificate of Participation — Enable: An Accessibility Ideathon, Unstop (Feb 2026)

ACHIEVEMENT

SIH'25 Finalist 2025

- Led the team to the final of Smart India Hackathon
- Established the skill of working with a team on a combine group project and bringing the ideas to life

AERION(KNIT's First Aeromodelling Event) Finalist 2026

- Accomplished top rank in aeromodelling quiz round.
- Made an aeroplane using depron sheets, servo motors, connection rods, power source and won the aeromodelling competition with that .
